SUMMARY

As an AI Alexa Data Trainer at Amazon and Founder & CEO of Syncronota Technologies Pvt. Ltd., I bring a wealth of experience in artificial intelligence, machine learning, and technical training. With a strong foundation in AI, ML, and web development, I possess deep analytical and engineering skills for designing, developing, and testing innovative solutions. My leadership at Syncronota focuses on empowering students with industry-ready skills through cutting-edge training programs. I have hands-on experience with Python, C, VS Code, Colab, Jupyter, Git, GitHub, Photoshop, and Figma, making me well-equipped to handle real-time projects and drive technological innovation.

EDUCATION

KKR AND KSR Institute of Technology and Sciences – Andhra Pradesh, India — April 2024
Bachelor of Technology in Computer Science and Artificial Intelligence — GPA: 8.29/10.0

TECHNICAL SKILLS

Programming: Python, C , SQL, HTML, CSS and JavaScript
Course work: Generative AI, Machine Learning, Deep Learning, Database Management System, Data Structures and Algorithms, Cyber Security
Miscellaneous: Problem Solving, Excel, PowerPoint, VS code, Git, GitHub, Photoshop, Figma, Linux.

WORK EXPERIENCE

Syncronota Technologies Pvt Ltd
Founder and CEO
As the Founder and CEO of Syncronota Technologies, I'm committed to transforming education by bridging the gap between academia and industry. Our mission is to equip students with cutting-edge technical skills, empowering them to excel in today's dynamic corporate landscape. Through innovative training programs and a focus on real-world applications, we foster the next generation of tech professionals and entrepreneurs.

Amazon — June 2024 – Current
AI ALEXA Data Trainer
As an AI Alexa Data Trainer at Amazon, I specialize in training and refining Alexa's AI models to enhance user interactions and improve voice recognition accuracy.

J.P. Morgan Software Engineering Virtual Experience — August 2023 – November 2023

- This was a great experience and a cool learning experience to take part in during this summer break and something different to do other than watching the frequent Laker games. I'm looking forward to embarking on new opportunities, and learning more about the different things available for software engineering!

ACADEMIC PROJECTS

Student Emotion Perception using Machine Learning : Development of accurate and personalized machine learning models for realtime emotion recognition in students, utilizing multiple modalities and contextual factors.
Automatic Question Paper Generation using Artificial Intelligence and Natural Language Processing: Successful creation of an artificial intelligence and natural language processing-based system for automatic question paper generation, streamlining the process of generating diverse and relevant questions for assessments, examinations, or quizzes in educational settings.
Fake News Detection on Social Media Using NLP: Developed a web application and Chrome extension utilizing NLP for real-time classification of news articles, distinguishing between real and fake news while providing contextually accurate information to enhance media literacy.

ACHIEVEMENTS

- Awarded first prize in an Innovation Marathon among 150+ teams conducted by KITS - 2022
- Achieved second place in a national-level hackathon project expo, demonstrating excellence in project development and presentation skills.
- Secured the 5th position in an international virtual AI hackathon organized by SRET College, showcasing global proficiency in artificial intelligence solutions.

PUBLICATIONS

- Published "AI-Enhanced Question Paper Generation Using NLP" in IJCRT, contributing to NLP and educational technology (https://ijcrt.org/papers/IJCRT2312530.pdf).
- Implemented a machine learning model for multiple disease prediction, featured in IJSRED https://www.ijsred.com/volume7-issue1-part11.html.

CERTIFICATIONS

Microsoft Azure 900 Professional certification – *Microsoft*
AI Engineer - Microsoft
Wipro Certified Full Stack Developer – Wipro
